Ὀλύμπια Δώματα'

OR, AN

ALMANACK

For the YEAR of our

LORD GOD 1719.

Being the Third after Biſſextile or Leap-Year. and from the Worlds Creation, 5668.

Wherein is contained the Lunations, Conjunctions, Aſpects and Effects of the Planets; the Increaſe, Decreaſe, and Length of the Days and Nights; with the Riſing, Southing and Setting of the Planets and Fixed Stars throughout the Year, whereby may be known the exact Hour of the Night at all times, when either the Moon or Stars are ſeen; and an Equation Table, for the rectifying Pendulum Clocks and Watches.

Calculated according to Art, and referred to the Horizon of the antient and renowned Borough-Town of *Stamford*, (formerly a famous Univerſity) whoſe Longitude is 24 deg. 20 min. and Latitude 52 deg. 41 min. fitting all the middle Counties of *ENGLAND*, and without ſenſible Error the whole Kingdom.

Non eſt è Terris mollìs ad Aſtra Via.

By JOHN WING, Philomath.

IMPRIMATUR, W. B. *July* 29. 1718.

LONDON:
Printed by J. Dawks, for the Company of STATIONERS, 1719.

K Rheumides

Common Notes for this present Year.

The Terms and their Returns this Year, 171

Hilary Term begins January 23, and ends February 12, and hath 4 returns, *viz.*

- Octab. Hilar. January
- Quind. Hilar. January
- Craſt. Purif. February
- Octab. Purif. February

Eaſter Term begins April 15, and ends May 11, and hath 5 returns.

- Quind. Paſch. April
- Tres Paſch. April
- Menſ. Paſch. April
- Quinq. Paſch. May
- Craſt. Aſcen. May

Trinity Term begins May 29, and ends June 17, and hath 4 returns.

- Craſt. Trin. May
- Octab. Trin. June
- Quind. Trin. June
- Tres Trin. June

Michaelmas Term begins October 23, and ends November 28, and hath 6 returns.

- Tres Mich. October
- Menſ. Mich. October
- Craſt. Anim. November
- Craſt. Mart. November
- Octab. Mart. November
- Quind. Mart. November

Our Laws in being now are very good,
If well apply'd, and rightly underſtood.
Complementum Legis Pax eſt.

Venus is a Morning Star until the 14 Day of January, and fr thence She becometh an Evening Star to the 29 Day of Octob and from thence a Morning Star to the end of the Year.

his Table shews the Interest of any sum of Money from 1 *s.* to 100*l.* from a day to a year. And by the help of Addition you compute the Interest of any sum whatsoever. And note, that for reater exactness the peny is divided into a 100 parts; so that 25 are a farthing, and 50 parts an half-peny, and 75 parts 3 far-, &c.

Example:

e Interest of 100 *l.* for six months one Week and one day, is tha by the Table.

l. s. d. q.

Interest of 100 *l.* { for 6 mon. 03--0--0--00 / for 1 week, 00--2--3--61 / for a day, 00--0--3--94 } = *l. s. d.* viz. 03--2--7 half-peny

03--2--7--55

A Regal Table in a more exact manner.

K. George	1714	Auguſt	1	Whom God grant long to Reig								

Here Gods Vicegerents do in order ſtand,
And how Succeſſively each Rul'd the Land:
May we not want a Monarch great indeed,
Wiſe, Good and Gracious, Merciful in Need:
For ſuch a one may all good Chriſtians ſtand,
Both now and always for to Rule this Land.

Table shewing the Bearing, Distance, Longest Day, and Difference of Meridians of most of the principal Cities in the World, from the famous City of LONDON.

*** Note: That q stands for Quadrans a quarter of a part; ſ for Semiſis half; and d for Dodrans three quarters of a Part.

o find the true Hour of the Day by the former Table.

Ake a Staff of what length you pleaſe, and with a pair of Compaſſes divide it into ten equal Parts, marking n upon the Staff; then in ſome level Place where the doth ſhine, ſet it upright, and mark where the end he ſhadow falls: which done, meaſure with your Staff length of the ſhadow, and note the Parts it contains, h find out in this Table right againſt the Day of the nth, and over head you will find the true Hour of the ; as will appear more clearly by Example.

ppoſe the 9th of *April*, or 13th of *Auguſt*, I ſhould find ſhadow of the Staff to be 30 Parts and a quarter of rt more, that is, three Staffs length, and a quarter Part, therefore ſeeking in the Table, againſt the ſaid , I find 30 *q* which is 30 Parts and a quarter; and over head that it is then either 7 a Clock in the ning, or 5 in the Afternoon; ſo that if your Obſerva- was in the Morning, it was 7; but if in the After- , 5 a Clock.

hus the 13th of *February*, or 8th of *October*, if the ſha- of the Staff be juſt 19 Parts, it is 12 a Clock, if it's one a Clock, if 24, two a Clock, if the Obſerva- be made in the Afternoon.

hus you ſee the Hour of the Day is exactly and ſpeedi- und, by a Rod or Staff, and the help of this Table; kewiſe by the *Kalendar* Part may the Hour of the t be known either by the Moon, Planets, or Fixed , being of Excellent Uſe to all ſorts of Men.

* Note: That *q* ſtands for

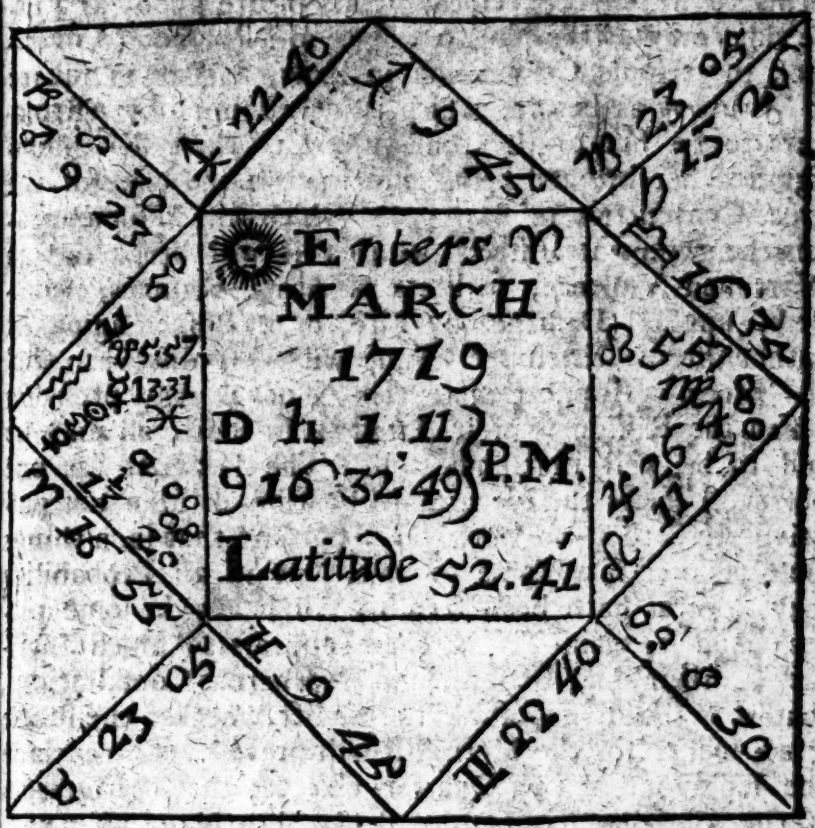
Dame Flora *appears now in her rising Dress,*
And th' Spring comes on, poor Mortals to refresh;
The painted Meadows in a glorious Spring
Doth bring to Life, and cherish every thing.
Great are the Blessings England *doth enjoy*
In Substance, Plenty, Peace, and Unity:
And who can't tell these are esteem'd a Blessing?
Then pity 'tis they are not more in Fashion:
Consider what's amiss, and who it is
That doth oppose our growing Happiness:
Reform, Reform from Folly, Faction, Pride,
Then none need fear Wars would this Land divide.
These, and such Evils doth occasion Wars,
With home-bred Hatred, and uncivil Jarrs;
When these, and others of this Nature cease,
And all Men readily encourage Peace.
These put in Practice, and well understood,
Then happy are we in each other's Good.

Of the Spring *Quarter.*

THE *Spring* Quarter beginneth this Year in the M[eri]dian of *Stamford*, on the 9th Day of *March*, [at] Hours, 32 Minutes, 49 Seconds, *post meridium*, but mo[st] vulgarly on *Tuesday* the 10th of *March*, 32 Minutes, [49] Seconds past 4 in the Morning, at which time the Positi[on] of the Heavens are as this Scheme directs, where [the]



find ♄ in ♏, in ſquare to ♓ in the Regal Sign ♌, in ✶ to ♂ in ♑, and △ to ☿ in ♐. *Jupiter* is △ to ♀, and the ☽ applyeth to the △ of ♓. The ☉, ☽ and ♀ are in ♂ in ♈, and all in □ to ♂ in the 12th in ♑. The Poſtventional New Moon happens a little above two Hours after the time of the Ingreſs; and the preceding Full Moon happens *February* the 23d, in ♍, which is not much to be enquired into here. The Fixed Sign *Aquary* is upon the Culp of the Eaſt Angle, a Sign of the Airy Triplicity: Hence I obſerve here appears nothing in this preſent Poſition of the Heavens either forceable, or violent, yet great and conſiderable Alterations are very likely to happen in ſeveral Parts of the World; the *Turks* appear yet to be troubleſome, reſtleſs and uneaſy, to the endangering of their Cauſe, notwithſtanding the Horſe Tail: And a Northern Prince

ſeems to have little reſpect of his future good, as a lit
tle time may awake him to a ſence of: But not to over-
look the tripple Conjunction in *Aries*, and all in ſquar
to ♂ in ♈ as before, which is looked upon by Aſtrolo
gers to be but of ill Conſequence to thoſe Kingdom
ſignified hereby, and being alſo ſo near the place of th
great Conjunction in *May* 1702, which will in ſome mea
ſure heightens its Effects, whither it will break out i
Wars and Violence, in Feats of Arms, Rapines, Mur
ders, unuſual Damages by Fire, or by ſome raging o
unthought of Diſtemper, Time will beſt diſcover, tho
the Moon's Application to the △ of ♆ may probabl
leſſen the Rigidneſs of its Effects: In ſhort, all may b
ſaid to be well that ends well. The Heavens (as on
obſerves) ſhews the Natural Inclinations of Men, not paſ
ſitive Acts, they do not, I ſay, portend that ſuch thing
muſt of Neceſſity come to paſs, but in all Probabilit
may, and as hath been ſeen to fall heavy in ſome pla
ces: And in plain Terms, there appears ſo much Intri
cacy, diſſembling Actions, and treacherous Conſultation
that it is almoſt impoſſible to predict whether the ſubtl
Peace-maker, or the Martialiſt will prevail. To conclud
the Judgment of this Quarter, obſerve, that the Decree
of the Almighty ſignify'd, or declar'd to Man, vary not,
but ever ſtand immutable, and therefore ought not, fo
or thro' the Infirmities, or Weakneſs of Man, to be un-
dervalued by any, for God rules all things eternally by
his Providence, and hath left to Man ſo much an inſight
of Preſcience, by which natural Knowledge he may diſ-
cover in part. God direct the Endeavours of our Supe-
riours, and thoſe noble Heroes that labour to ſettle or
confirm the great Affairs of Peace and Unity amongſt us.

The World's grand Councel ſeems to be in Arms,
And ſo involve themſelves in further Harms,
Some by Conſent, others by Compulſion,
So by Degrees do work their own Confuſion:
Theſe Military Acts are caſt by Lot,
Which maketh Difference ſcarcely known for what.

Fortuna fecunda amicos habet plurimos, adverſa nullos.

Of

Of the Summer *Quarter.*

THE Summer Quarter is always ſaid to begin when this our earthly Globe inclining Southward 23 Degrees 29 Min. towards the Sun, will volve and remove us her Northern Inhabitants to the greateſt Portion of Day, or when the Sun (according to appearance) enters the firſt Scruple of *Cancer*, which either way taken, falleth this Year on *Sunday* the 11th Day of *June*, 44 Minutes paſt 4 in the Morning, and then doth 12 Degrees of *Cancer* riſe in the Eaſt Angle, and 10 Degrees of *Piſces* is upon the Mid-heaven, and the Places of the Planets and Geocentrick Aſpects are thus, ☉ 00° 00′ ♋. ☽ 23° 40′ ♌. ♄ 7° 52′ ♏. ♃ 0° 32′ ♑. ♂ 1° 16′ ♓. ♀ 6° 10′ ♌. ☿ 7° 30′ ♊. ♌ 1° 2′ ♑. Aſpects, ✶♄♃. △♄♂. □♄♀. ☍♃♂. △☉♄. ✶♃☉. □♃☿. △☉♂. ☌♂☽. ✶☉☽. The major part of theſe Teſtimonies bid fair for reconciling of Differences, both abroad and at home, tho' ſomewhat obſurly, for the Significations are under the Earth, and ſeems to be ordering and diſpoſing of matters to this purpoſe, for the ✶♄♃, the trine of ♄ to ♂ and the ☉, and ♂ in trine to the ☉ alſo, are all corroberating Inſtances for promoting of Peace in ſeveral Countries, and ſeems to be proſperouſly carried on, without Clamour, Noiſe, or Diſturbance, and it is heartily to be wiſh'd that the Minds and Inclinations of Men (where Peace is wanting) were anſwerable, and generally tend that way, then may we expect to enjoy Peace and Tranquility in the World, when the natural Depravity of the Minds of Men to thirſt after Ill do not oppoſe it.

The Affairs of *Great Britain* are at preſent in a hopeful and peaceable Condition, being a good Underſtanding between the King and his People, and Trading flouriſheth.

What

What cause then hath poor Mortals to fear Ill?
Since the Heavens plainly tell us all's near well,
And doubtless might continue so, if we
Would leave off Tricking, Plotting, Treachery;
Be true and faithful to your God and King,
These, and their Fellows would some Comfort bring.

Qui enim resurgit in anima, resurget in corpore ad vitam.

Of the Autumn *Quarter.*

THE Autumn or Harvest Quarter begins at such time as the the Sun toucheth the first Scruple of the Equinoctial Sign *Libra*, or more really when the Earth enters *Aries*, hath volved her self at Right-angles to the Sun, and receiveth a like Portion of Light and Darkness, which either way taken happens this Year on *Saturday* the 12th Day of *September*, 2 Minutes past 6 after Noon, at which time the Planets Places and Aspects are as I have here plac'd them, ☉ 00° 00′ ♎. ☽ 6° 0′ ♒. ♄ 11° 32′ ♏. ♃ 19° 3′ ♍. ♂ 28° 53′ ♒. ♀ 13° 31′ ♏. ☿ 10° 50′ ♎. ☊ 26° 6′ ♌. Aspects. ✶♄♃. ☌♄☿. □♄☽. ✶♃☿. △☉☽. ☌☉☿. At the time of this Ingress, the first Degree of *Aries* is ascending, and the first of *Capricorn* culminates, and the Postventional Full Moon is in sextile to her place in this Quarter's entrance. This Scheme is of a peaceable Nature and Disposition, as appears from the Conjunction of *Saturn* and *Venus* in the seventh, and both in sextile to *Jupiter*, and trine of the Sun and Moon, so that I cannot see any thing that seems disagreeable to the Tempers of Mankind in general, worth taking Notice of, except some small Debates and Controversies amongst Princes Agents, Envoys, and Ambassadors, about Affairs touching their Masters Business, but for any thing tending to publick Quarrels, Ruptures, or Wars, here is very few Rays to that purpose.

And

And thus the Starry Science doth foretell,
When Differences riſe, and when all's well;
As they're appointed by th' Creator's Will,
They keep their Courſe, and act in Order ſtill:
With one conſent, let all give God the Praiſe,
And that he would us bleſs with peaceful Days.

Paces quidem nomen, ubique eſt, res autem nusquam.

Of the Winter *Quarter.*

THE Winter Quarter makes its Entrance at ſuch time as our earthly Globe by its Circumrotation hath volved it ſelf to the greateſt Inclination, whereby we being fartheſt deflected from the Sun's Rays, receive leaſt Light, and cauſes our ſhorteſt Day and longeſt Night, or according to Appearance, when the Sun enters *Capricorn*, which either way taken, falls this Year on *Friday* the 11th Day of *December*, half an Hour paſt 8 in the Morning, at which time 4 Degrees of *Capricorn* aſcends in the Eaſt, and 10 Degrees of *Scorpio* is upon the Mid-heaven, and ☉ 00° 00′ ♑. ☽ 8° 50′ ♉. ♄ 21° 37′ ♏. ♅ 4° 24′ ♎ ♂ 2° 32′ ♈. ♀ 17° 15′ ♏. ☿ 18° 5′ ♑. ♇ 21° 17′ ♌. Aſpects. ☌ ♄ ♀. ✶ ♄ ☿. ☌ ♄ ☽. □ ♅ ☉. ☍ ♅ ♂. □ ☉ ♀. ✶ ♀ ☿. ☌ ♀ ☽. △ ☿ ☽. Theſe thoroughly conſulted with the Pre and Poſtventional New and Full Moon, produces variety of Matter for the Aſtrologer to diſcant upon: The Poſition in general is violent and tends to new Differences both at home and abroad, for ♂ in ♈ is in ☌ to ♅, and □ to the ☉, and all from Cardinal Signs ſeems to confirm what I have here ſaid, and more to the ſame Purpoſe.

Stop here my Pen, and for the Year's Concluſion,
Let each one mend one, which prevents Confuſion:
Why mayn't this be? for then the Wars would ceaſe,
The World would then be Unity and Peace:
But where Contention grows, Revenge and Pride,
There Peace and Unity are laid aſide.

Virtus extollit ignobiles.

Of-

Of the Eclipſes *this Year.*

FOur times this preſent Year will the Luminaries be Eclipſed, *viz.* twice the Sun, and as often the Moon, and only one of the Moon (and a ſmall one too) that will be viſible to the Inhabitants of *Great Britain.*

The firſt is an inviſible Eclipſe of the Sun, on the Eighth Day of *February*, juſt before Sun riſing, therefore not viſible.

The ſecond Eclipſe is of the Moon, on the 23d Day of *February*, near 8 in the Morning, the Sun being then up, ſo not viſible.

The third is an Eclipſe of the Sun, on the 4th Day of *Auguſt*, near 6 in the Evening, and altho' the Sun be above the Horizon at the time of this Eclipſe, yet it cannot be ſeen in any part of this Iſland, by reaſon of the Moon's ſouth Latitude, which is increaſed by her Parallax of Latitude, ſo that their Sum exceedeth the Sum of the Semidiameters, which proves the Inviſibility of this Solar *Deliquium* here, but will be ſeen in the more Southern Parts of the World.

The fourth and laſt Eclipſe is a viſible Eclipſe of the Moon, on the 18th Day of *Auguſt* in the Evening, according to the following Calculation from *Scientia Stellarum.*

	S. D.	D. H. ′ ″
Equal time of the true Oppoſition, *Auguſt*	18	8 48 46

The

The Opinion of several Learned Men, concerning the Time of the World's Continuance, &c.

TOuching the Time of the World's Continuance, the *Jewish Rabbins* hath delivered a point of Doctrine, grounded upon Consideration of the Order that God observed in the Creation; and how that thro' his infinite Power, and unspeakable Wisdom, in six Days created Heaven and Earth, the Sea, and all things therein contain'd, but the Seventh Day he rested, and hallowed the same. They have peremptorily concluded, that according to this mysterious Order, the World shall last six Thousand Years, and in the beginning of the seventh, all things should rest. Six Thousand Years (they say) is the Age of the World, two Thousand void, two Thousand under the Law, and two Thousand under the Days of the *Messias*: So that according to this Account, there being 1719 Years passed since the Nativity of Christ, 'till the end of this Year, there should remain to the end of the World but 281 Years, which some (with *Malvenda*) will say, *quod furor est cogitare*: And with *Genebrand* accuse the *Rabbins* of Folly, for writing an Opinion so strange: But let me desire them to be a little careful, and thoroughly examine all things before they accuse any one; for in so doing they not only accuse the *Jews*, but the most Learned of the Christians also; I shall say nothing here of *Heremito Petrus de Aliaco*, *Cusanus Picus Mirandula*, nor of those mentioned by *Forrier*, who held the World should continue just so many Years as there are Verses in *David*'s Psalms. Neither shall I speak of the ancient Philosophers, as of *Aristarchus*, who affirmed that the World should last but 2484 Years: *Diarchinus* assigned for its Duration 5552 Years, but *Herodotus* and *Linus* allow it 10800 Years, and *Dion*, who said it should continue 13984 Years, as *Cassander* did 1800000 Years. I shall only shew what the Opinion of the learned Fathers of the Church was, whose Lives are irreprovable, *viz. Irenæus*, St. *Hilary*, St. *Ambrose*, St. *Augustin*, St. *Hierome*, with many others, having considered the Order that God observed in the Creation of the World, and how that having in Six

Days

Days perfected all his Works of Creation, and rested the Seventh. They also considered, that the Transfiguration of Christ, *Matth.* 17. 2. was six Days after his Speech to his Disciples, concerning his Death, Resurrection, and coming in the Glory of his Father with his Holy Angels, to reward every Man according to his Works, *Matth.* 16. Wherein they have reposed a high Mystery, imagining and perswading themselves, that by the sacred Ministry of his holy Word in this present Life, within the compass of 6000 Years, he will also gather together his Church, wherewith in the seventh he will celebrate, and keep holy his eternal and everlasting Sabbath, applying (according to the Doctrine of the *Jews*, called of some, *The Prophecy of* Elias) to every Day a Thousand Years, alledging to that Effect out of *Psal.* 90. 4. *For a Thousand Years in thy Sight are but as Yesterday*, and citing withal the place of St. *Peter*, in his second Epistle, *Chap.* 3. *ver.* 8. *But (beloved) be not ignorant of this one thing, that one Day is with the Lord as a Thousand Years, and a Thousand Years as one Day.* In a Word, it would ask a particular Volume to set down all that the Fathers have written concerning the End of the World: But some may object and say, If the World be to last but 6000 Years, then by consequence, the Day of Judgment may be foreknown, which contradicts the Holy Scriptures. I answer, That these Learned Men have not at all defined the Days, but only the Years: Now the Years that are passed since the Creation to this present Time, is uncertain, as may be seen by the several Computations now in use amongst us, but that Account my self and most Writers confide mostly in, is taken from the best of History, which makes from the Creation, at the end of this present Year 5668 Years. The Eastern Churches at the same time account for no more than 5218 Years, which is 450 Years less than the former, and the Western Churches will have it to be at the time aforesaid, 6917 Years since the Creation, which differs from that Account of the Eastern Churches no less than 699 Years. The *Hebrews* since the Creation make it 5479 Years. *Josephus* (the *Jewish* Historian) affirms, in the first Chapter of

of his Antiquities, that the World was created before Christ's Nativity 3962 Years; he then accounts the Year of the World 1, which taken from that Number, by reason the Year was not expired, there remains 3962, which exactly agrees with Mr. *Partridge's* Chronology taken from the Scripture, as may be seen in his Almanack 1701. Thus have I given a short Specimen from these former Accountants, who have with great Diligence computed the Years from the Creation until the Birth of Christ. And for a further Proof of the Uncertainty of the Time of the World's Creation, see *Arnaldus*, *Pererius*, *Genebrand*, *Malvenda*, *Scaliger*, *Picus Mirandula*, *Mercator*, *Palavinus*, who differ above a 100 Years in their Computations. Hence we may safely conclude, that neither the Number of Days, nor yet of Years passed since the Creation, can be exactly known, without some special Revelation, notwithstanding the Endeavours of the learned *Pererius* to prove the contrary, but he ought to have reconciled these Authors among themselves, and to shew how they have erred in their Computations.

ADVERTISEMENTS.

ARtificial Teeth set in so well as to eat with them, and not to be discovered from Natural, nor to be taken out at Night, as is by some falsely suggested, but may be worn Years together; they are an Ornament to the Mouth, and help the Speech: Also, Teeth cleaned and drawn, by *John Watts*, Operator, who applies himself wholly to the said Business, and lives in *Racquet Court*, *Fleet-street*.

THE Author hereof thought fit to give Notice to those that have occasion to make use of him; First, in Surveying of Land, laying out, and dividing Inclosures, or any thing belonging to the Art of Surveying. Secondly, Dialling, whether Direct, Declining, Inclining, Reclining, Convex, or Reflex. Thirdly, Mensuration of Buildings, either for Master, or Workmen. Fourthly, Drawing Platforms, or Draughts (which is the Art of Architecture) for Buildings, and giving Directions for the carrying on thereof.

Pickworth in the County of *Rutland*. 1719. *John Wing.*
